A MAZE the computer games and music festival in the Berlin

By combining courage for experimentation and joy in gaming, the recent A MAZE festival in Berlin celebrates the convergence of computer games and art.

A MAZE is more than simply a festival – it is a series of events as well as a conceptual format that offers a platform for interdisciplinary exchange. From the 29th of January to the 6th of February in Berlin, creatives are encouraged to break down the conventional meaning of what a computer game is and does and explore the concept of play.
